Skills

- JavaScript (ES6+), React, React Hooks, HTML, CSS, SCSS
- Tailwind CSS, Bootstrap
- TypeScript (Basics), Node.js, Express.js
- MongoDB (Basics), Fetch API, REST API
- GitHub, Version Control, Responsive Design
- Shopify, Webflow
- Linux, CLI tools
- Communication and Team Collaboration

Languages

English (C1), Arabic (Native), Russian (C1), German (B2)

Education

Web Development – DCI Institute – 2024–2025

■ Finished a comprehensive Web Development program.

German Language & Job Application Coaching – 2022–2023

Frontend Development (Self-learning) – 2019–2022

■ Completed multiple Udemy and online courses.

Master's in Civil Engineering – A.N. Beketov Kharkiv National University – 2015–2016

Bachelor's in Civil Engineering – A.N. Beketov Kharkiv National University – 2010–2014

Experience

Jun 2025 – Aug 2025 – Germany

■ Practical training at Getdent Gesellschaft für Onlineanwendungen mbH.

■ Worked with Shopify, Webflow, and React to build and customize web applications.

■ Gained hands-on experience with Lovable AI for modern online solutions.

■ Strengthened practical skills in responsive design and real-world project development.

Aug 2020 – Feb 2022 – Ukraine

■ Worked in restaurants as service staff while pursuing frontend development training.

Aug 2016 – Jul 2019 – Lebanon

■ Employee at real estate management company for Lebanese government.

■ Managed and organized contracts and archives.

- Improved document efficiency and accessibility.
- Built project and time management skills.

Projects

CodeRealm – Full-Stack Learning Platform (Final Project)

■ Collaborated with a team of 4 to build a full-stack app for learning to code, solving exercises, and earning XP. Features include secure authentication, protected routes, and a progress tracking system. Built with React, Node.js, Express, and SQL. Contributed to both front-end and back-end development.

[Live Demo](#)

Responsive Design Challenge (4-Hour Challenge)

■ Built a modern responsive landing page using React, React Hooks, SCSS, and JavaScript. Applied performance techniques and fetched data from an external API for dynamic content. Demonstrated adaptive layouts using media queries and component-based design.

[Live Demo](#)

Terminal To-Do List (Object-Oriented)

■ Command-line app using JavaScript OOP. Features include task creation, editing, deletion, and user feedback collection. Designed to demonstrate back-end logic and interactivity.

Movie Website (Team Project)

■ Collaborated on a movie search app using React, React Hooks, and React Router. Integrated two external APIs to display trending movies. Features include pagination, search bar, and a system for marking favourites. Focused on API handling, modular components, and routing.

[Live Demo](#)

Chat Application – MERN Stack (Personal Project)

■ Developed a real-time chat application using the MERN stack (MongoDB, Express.js, React, Node.js).

■ Implemented secure authentication with JWT tokens, enabling users to register, log in, and interact with other logged-in users.

■ Built responsive UI and structured back-end API for handling messages and user sessions.

■ Focused on real-time communication, authentication flow, and smooth user experience.

[GitHub Repo](#)

Pflege Strategen Praxis Website – Webflow & JavaScript (Training Project)

■ Designed and developed a fully responsive healthcare practice website using Webflow and JavaScript during training.

■ Ensured adaptability across devices with professional layouts and interactive features.

■ Applied responsive design principles and optimized user experience for a real-world healthcare client context.

[Live Site](#)

FreshNuts E-Commerce Website – Shopify (Training Project)

■ Contributed to the development of an e-commerce website for a company.

■ Used Shopify to build and customize the platform.

■ Responsible for theme customization and improving the customer shopping experience.

■ Focused on professional UI, responsiveness, and functionality for online retail.
